

PLASTY-COMP

The **PLASTY-COMP** is a system that allows tiles to be laid without the unpleasant step that often forms with the traditional pose, in fact, it allows a "coplanar" pose.

The **PLASTY-COMP** consists of:

Levelling spacer

Art. Code P691X

Levelling Wedge

Art. Code P6911

Plier for levelling spacer simple / professional

Art. Code P6912 / P6912P

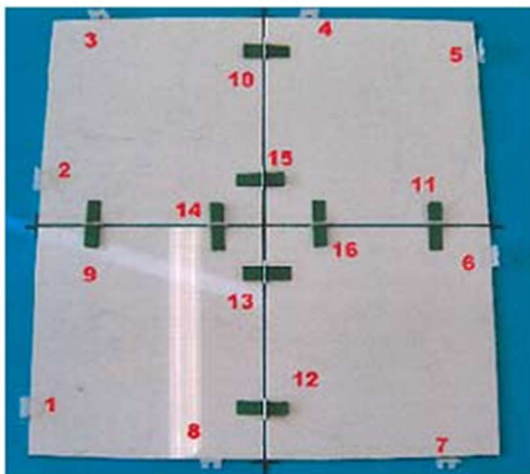

After spreading the adhesive glue, the base of the Levelling Spacer is placed under the tiles at the 4 sides of the tiles.

Depending on the size of the tiles it is recommended to place a quantity of spacers per square meter well determined (see table below).

E.g. 50 x 50 tile:

16 x levelling spacer (Art. Code P6910)

16 x levelling wedge (Art. Code P6911)

The two fins of the spacer of mm 2 determine the thickness of the escape.
Once positioned, simply tap the tile with a rubber hammer

Coating dimension (cm)	N. Pieces for m ²
30 x 60	22
30 x 90	19
40 x 40	25
40 x 60	17
40 x 80	16
45 x 45	20
45 x 60	15
45 x 80	14
50 x 50	16
50 x 100	12
50 x 120	10
60 x 60	11
60 x 80	10
60 x 100	10
60 x 120	8
80 x 80	9
80 x 100	9
80 x 120	7
90 x 90	7
90 x 120	6
100 x 100	8
100 x 120	7
120 x 120	6

Now insert the Levelling Wedge into the slot of the Levelling Spacer for tile taking care not to go beyond the breaking point. At this stage it is advisable to use the Levelling Spacer Pliers.

In this way the tiles align perfectly and very quickly, keeping them "COPLANARS". Once the glue has hardened, with one blow (always with a rubber hammer) in the direction of the escape, the protruding part of the spacer (which will be thrown away) will break, releasing the wedge which will always be recovered.

With the system "PLASTY-COMP" laying tiles will still be simpler and faster and the result will always be perfect!
